

BITEXLIVE, Turkey-based digital asset exchange

Bitexlive team, *correspondence: info@bitexlive.com

Bitexlive is a Turkey-based digital asset exchange offering maximum security and advanced trading features.

Bitexlive is a cryptocurrency exchange platform that allows their users to exchange different cryptocurrencies with other users.

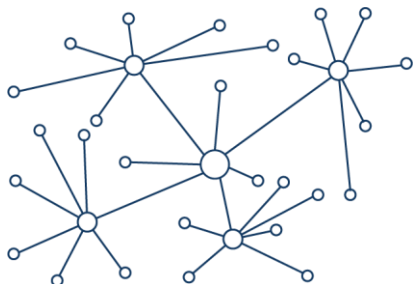

BitexLive provides a fast, dependable and user friendly trading platform for Bitcoin, Bitcoincash, Ethereum , Dash, Litecoin, Zcash, Ripple, Verge, Dogecoin, Bitcore, BFFcoin, CrudeCoins, Digibyte, Examination, Folmcoin, KredsCoin, NativaAmericanCoin, ROIcoin, SpeedCash, Stipend, Stratis, Straks, Unify, Boost and Pivx on a professional exchange platform.

Our mission is to deliver the fastest, most secure and great support on our trading platform for the community.

We started 22 currencies with two different markets (BTC and USD) and will be adding more coins as we get community feedback. It is important to us that our platform performs to our high expectations before additional currencies and features are added. At the moment there are 26 currencies and we work hard to add more.

Also depositing USD via Payeer, AdvCash, Perfect Money are available on the platform.

Supported languages at the moment English, Turkish, Deutsch and more will coming.

[Features]

Custom built trading engine - Our custom trading engine was developed from the ground up with speed and scale as the priority. Orders are executed as soon as they are placed and you will never see a crossed order book or a delay in processing of any trades.

Secure platform – We employ the latest security technologies to protect you and us. We use an elastic multi stage wallet strategy ensuring that 80-90% of funds are offline and safe. Additionally two-factor authentication (through email or google authenticator) is required for all withdrawals and API usage. We designed everything from the ground up with security in mind.

Fast deposits and withdrawals - Our fully automated monitoring platform allows for near instantaneous updates on balance, trade, and wallet information. You will never be left wondering where your funds are or if your deposits are blocked. Information is always up to date.

Complete and easy REST API - We have designed the most complete API set for developers to build on our platform. Our full featured set of APIs allow you to easily deposit, trade, and withdraw to and from our exchange, enabling arbitrage scenarios never possible before. BitexLive was built with high frequency trading in mind.

Follow and stay tuned for great updates and development in our announcement thread as well!
